

# USB SOCKETS

1 & 2 Gang switched sockets

with single USB

Suitable for most tablets, smart phones,  
cameras & other USB devices.

### 13A 1 & 2 Gang switched sockets

with single 2.1A USB outlet

Our 1 & 2 Gang switched sockets with single USB outlet are available in 84 plate designs and finishes within the CLICK® brands.

This provides flexibility for use in various locations i.e. lounges, kitchens, bedrooms and offices.

## Features & Benefits

### Integrated Central USB Outlet

Eliminate the need for bulky chargers and free up your plug sockets with a 1 or 2 gang switched socket with integrated USB! The convenient USB port is centrally located to avoid cable interference from anything that may be plugged into the sockets.

### Twin Earth Terminals

For a simple connection of the Earth conductor.

### Mounts into 25mm Backbox

Our retrofit 2 Gang sockets have a depth of just 20mm and can be comfortably mounted into a 25mm back box\*

\* Define® and Definity™ requires 35mm back box.

Our 1 Gang sockets require a 35mm Backbox\*

\* Define® and Definity™ requires 47mm back box.

### Safety

Tested and complies with UK safety and EMC requirements and is in-line with EU legislation. The USB Socket ranges also benefit from **short circuit protection**, so should there be a short on the output the power supply will shut down and reset after the short circuit has been removed.

### USB Output 5 Volt 2 Amps

Suitable for most tablets, smart phones, cameras and other USB devices, all of which can still be used whilst charging! Our single USB output guarantees optimum charge rate regardless of the device charging.

(Please see additional information on optimum charge below)

When plugged into the USB port the device will indicate it is being charged.

Did you know it's the device plugged into the USB power supply which governs the charge acceptance rate?

With more complex charge-management software and circuitry being built into tablet computers, smart phones, E-readers etc. the amount of current that the device will accept is limited. Devices will go into protection mode in order to protect itself when it recognises fluctuations within the power supply, resulting in reduced charge or no charge at all.

Supply fluctuations can occur for a number of reasons; including the plugging in of another device into a neighbouring charge outlet as the two devices compete for their share of the available charge capacity. Utilising a single USB option eliminates the potential for this problem to occur. The single USB outlet provides a constant charge rate, guarantees optimum charge no matter what the device, and has proven to reduce the recharge time of your devices.

# 6 Ranges...

## Mode™

1 Gang **CMA771** | 2 Gang **CMA770**

A stylish, contemporary & flexible range of smooth profile wiring accessories. All products within the range are antimicrobial certified.

## Polar™

1 Gang **PRW771** | 2 Gang **PRW770**

A premium range of bright white accessories, all products within the range are antimicrobial certified.

## Deco™

MOULDED      INGOT      MOULDED      INGOT  
1 Gang **VP\*771** or **VP\*571** | 2 Gang **VP\*770** or **VP\*570**

Decorative metal wiring accessories in assorted plate finishes demonstrated below. All DECO™ products are available with black or white inserts, excluding antique brass and black nickel finishes which are supplied with black insert and gasket only.

When ordering any Deco™ products, please specify the required finish by following the simple code structure shown here. For Georgian style cast brass, please replace the 'Plate style' and 'Product finish' with GCBR eg. GCBR570BK.

Plate style    Product finish    Product no.    Insert colour
